

## BlueStylus Time & Billing Scores a 9 out of 10 for Value.

### Q/A

with Julie Zurn

Julie Zurn is a knowledgeable bankruptcy attorney practicing in Ohio. With almost 20 years of experience, Julie is familiar with all aspects of administering bankruptcy cases for her clients. She launched Zurn Law to assist clients in achieving their goals by delivering high-quality legal services at a budget-friendly price. Julie uses BlueStylus Time & Billing to easily and accurately track her billable time.

#### BLUESTYLUS TIME & BILLING

"Non-billable tasks are more efficient so I can get through them quicker and back to billable tasks again."

#### How did you learn about BlueStylus Time & Billing?

“While attending an NABT annual conference, Andy Suhar, a big champion of the product, spoke to me about it. The price point was very attractive to me.”

#### How does BlueStylus Time & Billing compare to what you previously used for time tracking & invoicing?

“While I still use QuickBooks for bookkeeping, I switched to BlueStylus Time & Billing for time entry and invoicing. The time entry is easier in BlueStylus and I like the mobile feature. I can open up the app and record time if I’m away from my desk and take a client call.”

#### What do you like best about BlueStylus Time & Billing?

“The ease of use. It was easy to learn. Invoicing is pretty simple too. It’s a low-cost way to keep your time and billing in an effective manner.”

#### What do you find the biggest benefit BlueStylus Time & Billing delivers to your practice?

“Efficiency. It’s especially useful when I have a large project I’m working on. I just hit the timer, focus on the work, then hit the timer again when finished and my time is accurately recorded. There are also time savings in the time entry which isn’t a billable task. Non-billable tasks are more efficient so I can get through them quicker and back to billable tasks again. On a scale of 1-10, I would give BlueStylus Time & Billing a 9 for the value I receive based on the price I pay.”
